

FARM & STICKERS

LONG PUZZLE + 106 STICKERS

Observing the pictures, manipulating the materials provided and interacting with an adult-educator able to steer the activity or game, children improve their manual coordination, hone their visual perception and are inspired to learn new words.

SKILLS

Discover the world outside;
 Develop fine motor skills;
 Recognize shapes and outlines;
 Visual perception

FARM DISCOVERY

Before assembling the puzzle, the parent (or educator) can do some prep activities, presenting the characters and objects on the farm to the children. Show them the pictures on the sticker sheet and say the name of each thing out loud: "This is a horse!", "This is a dog!", "This is a cow!", "This is the farmer," "This is a scarecrow."

Continue like this, pronouncing the names of the vehicles, the farming equipment and foods from the vegetable garden. Once all items have been presented, ask the children to put the puzzle together. Ask the children to look at the shapes of the items and encourage them to find the matching stickers and to stick them in the right place.

Proceed as follows: each time the children choose a sticker, ask them one of the following questions: "What is this animal called?", "And what animal is this?" or, "What is this food called?", "What food is this?" Who eats this? Before the shape is placed in the correct place, each child should be able to recognize the characters and objects, and say their names out loud.
